AMORPHIA: THE CANNABIS CO-OP

We think it absurd to work for repeal and then possibly allow a complete takeover by establishment interests. There are obviously better possible uses of the money than to fatten the already bloated collars of big business. For instance, social action and alternate culture projects, experimental communities and consciousness research.

After legalization, Amorphia (which has the earliest trademark application on the home Acapulco Gold) will engage in production and design of legal marijuana as a non-profit foundation. The proceeds thus generated will be controlled by the people (anyone wishing to be a member) on a one person — one vote basis, through a monthly magazine polling system.

The time is right for an all-out campaign to end marijuana prohibition. The Cannabis Co-operative is entirely dependent on whether you choose one product

Now that's a mouthful. Well, we getting more together, remaining very we try to be practical, too.

Some of the focuses: communal living, ecology, wild gatherings, sources, environmental art, diet philosophies, herbs, laughing abundance. NLS readers keep their fingernails.

Real food for the body and soul is cakes do not satisfy hunger.
